REG-X AND BOSCH FLEXIDOME TEAM UP TO HELP CATCH CRIMINALS AT PRIVATE RESIDENTIAL COMMUNITY

When Liberty Village Active Adult Community experienced car theft and vandalism at its premises, it installed the [REG-X Close-Range License Plate Capture camera](#) to work in tandem with existing [Bosch FlexiDome cameras](#) in an effort to pinpoint individuals committing the crimes.

Situated at the gated community's access point, both Bosch FlexiDome and REG-X deliver highly effective surveillance: Bosch FlexiDome provides comprehensive day-night viewing of the property, enabling security operators to detect suspicious activity and unauthorized vehicles on-site. REG-X captures definitive plate images of all vehicles frequenting the premises, allowing positive identification of suspected offenders.

Within 36 hours of Bosch FlexiDome and REG-X providing joint surveillance at Liberty Village, authorities were able to identify and apprehend individuals who had been targeting the community. Liberty Village has not experienced further criminal activity since.

A real team effort

Bosch FlexiDome detects every vehicle that approaches the access point	Video from Bosch FlexiDome triggers the DVR to increase frame rate and resolution	REG-X captures a definitive plate image of the vehicle	Plate image is recorded by the same DVR at maximum resolution	Irrefutable plate image provides evidence that leads to identification and arrest of offenders

"I'm glad we were able to provide Liberty Village with such effective solutions to its security challenges. FlexiDome and REG-X were ideal choices for this application. FlexiDome produces an excellent image of the exact field of view we want – in this case, the access point of this gated property – for effective scene monitoring. And REG-X, delivering an absolute daytime and nighttime plate image of every vehicle, provides reliable information as to who frequents the site. Together, these cameras gave authorities the evidence they needed to identify and arrest the culprits committing crime at Liberty Village. The residents definitely feel safer and more secure."

Tim Longnecker, owner
Pro Video Engineering – Northfield, NJ

"I really appreciate the assistance that I received from the Bosch and Extreme technical support teams. With their help, we were able to easily install the cameras, and get Liberty Village's surveillance system up and running pretty quickly. And their ongoing support has been key to maintaining the equipment and upholding security at this community."
